

Estimator

TOOLS/EQUIPMENT/MATERIALS USED:

- Precision measurement tools, computer terminal. May require the use of shop equipment on occasion.

ESSENTIAL DUTIES AND RESPONSIBILITIES:

- Candidate will be responsible for preparing estimates, developing engineering processes and communicating effectively with customers.
- Ability to quote costs associated with manufacturing a product to customer requirements.
- Layout manufacturing processes suitable to our facility and our customer demands.
- Must have extensive knowledge of sheet metal manufacturing, including but not limited to understanding laser and turret processes, Brake forming, PEM operations, Spot-welding, TIG/MIG welding, Machining and secondary operations.
- Ability to work independently, proactively, meet deadlines and work as a member of a cohesive team

JOB KNOWLEDGE, SKILLS AND ABILITIES:

- Excellent Blueprint reading skills
- Solid understanding of GD&T
- Knowledge of SolidWorks is required
- Must have knowledge of material, AWS weld specifications and outside service processes
- Must have excellent analytical skills and be detailed oriented.

EDUCATION AND EXPERIENCE:

- Minimum 5 years' experience in estimating precision sheet metal fabrications and assemblies
- B.S. in Mechanical Engineering or equivalent experience.
- Must be PC literate in a windows environment.
