

Purchasing Manager

Sourcing excellence professional with strengths in supplier selection and negotiations, building supplier relationships, and ability to convert strategy into executable plans and deliver positive results for the business.

Proficient in sourcing of raw materials in support of manufacturing operations, developing relationships with suppliers and ensuring supply to meet cost, quality and delivery goals. She has lead or participated in new product launch teams, including commercialization decisions regarding sourcing and supply of raw materials; worked closely with business team reporting on supplier strategies and performance against established goals. Experienced in supervising teams with responsibility to manage workload and coach/mentor individuals. She is accomplished in ERP systems for executing purchasing processes and utilizing data collected to evaluate key performance metrics. Her work history includes engineering and quality with training in Lean Manufacturing and root cause analysis.

Meet with any of these candidates to learn more about how they could be an asset to your company!
