

Biotech Startup Seeking Diligent Worker

Position: Cultivation Technician

We are a group of entrepreneurs, engineers and scientists advancing wellbeing at the intersection of healthcare and agriculture. Specializing in mycology (the study of fungi), our mission is to **help more people from all walks of life, live a preventative, healthy lifestyle**. Empire Medicinals is a part of the global movement towards prevention over palliation. The rising rates of chronic diseases in developed nations (and developing nations) can be halted, and even reversed through changes in diet and lifestyle. Our challenge lies in the production of high-quality health foods and nutraceuticals capable of becoming pantry staples with lasting appeal.

Your Role:

This position requires working with the production manager, CEO, and other team members to assist in the production of gourmet and medicinal fungi. The job is a demanding role, requiring strength, agility, intelligence and an attitude of curiosity and discipline. The company gives preference to individuals with experience in mycology, agriculture, culinary arts or other related fields. Reliable transportation is required.

Duties:

1. Mushroom cultivation
2. Crop harvesting
3. General cleaning and facility maintenance
4. cGMP, FDA compliance note-taking

Must have Qualifications:

1. Minimum of GED (high school level). Preferred Associates degree in a scientific background.
2. Proficient listener.
3. Fast learner.
4. Team player
5. Detail oriented.
6. Cool under fire.

Compensation:

Maximum of 20 hours / week @ \$12-\$15 / hour for the first 2 months. Then gradually scaling up to 40 hours / week.
