Event Timing Technology Assistant

Full Time Position Description

As the Event Timing Technology Assistant for YellowJacket Racing Department, you will validate the goals of thousands of runners by providing finishers their times and results at approximately 80 annual events. This role will also have significant involvement with logistical planning around marquee events including the Rochester Marathon, Webster Turkey Trot, Rochester Regional Health Flower City Challenge, Reindeer Run and Winter Warrior Half Marathon.

This job may be right for you if:

You like working with technology. You like a fast-paced environment and don't get flustered easily. You have a focused attention to detail and enjoy solving problems. If you don't know the answer, you'll search until you find it.

Job Responsibilities

- Event timing project lead for 80 annual events, including identifying event timing requirements and creating a logistical plan in conjunction with other members of the YellowJacket Racing team.
- Configure and run custom timing and registration apps, including event day troubleshooting.
- Prepare and manage timing equipment and other hardware, including preparation and testing, maintenance and equipment inventory.
- Manage the on-site team with timing equipment setup and configuration, verifying signal flow.
- Manage race entrant and finisher data, including reports, statistics and historical records, ensuring data accuracy.
- Logistical planning around equipment deployment, including creating timelines and diagrams.
- Help runners who might not have received their results by making corrections.
- For Contract Timing Events, work with race directors, including sourcing equipment, scheduling staff, equipment inventory, deployment and recovery.
- Assist the Manager of Event Timing technology to make things run smoothly for the team.

You're good at:

- Tinkering with technology, including figuring out how things work

- Running all kinds of software, including learning custom apps that we created
- Preparation, problem solving and confidence under pressure
- Stats and numbers and providing detailed analysis
- Communicating your ideas and putting them to paper
- Helping customers who might have fallen through the cracks

Position Requirements

- Basic networking and TCP-IP background recommended.
- Knowledge of video equipment and asset management recommended.
- Customer service background recommended.
- Excellent written and verbal communication skills.
- A willingness to be up early and work outdoors in different locations on the weekends in all weather conditions.
- Valid & Clean U.S. driver's license and ability to drive a box truck.
- Ability to lift 50 lbs.
- Proficient in Microsoft Business Applications; Excel; PowerPoint; Word.
- Some experience in the sport (USATF Official Certification or participation in endurance events).
