- Specialized in fiber tools (OTDR, Power Meter and Light Source, VFL, Fusion Splicer);
- Able to view and print traces
- Advanced trouble shooting skills
- Theory of telecom
- Strong knowledge of fiber optic construction and maintenance
- Understand splice schematics

Functions and Responsibilities:

- OSP Technician will be responsible for splicing fiber, the installation and operation of Outside Plant (OSP) and Inside Plant Fiber Optic/Copper Networks as well as confirms accurate cable terminations on cross connect, patch panels and ONT's
- Work aloft and in close spaces up to 50ft in a bucket truck, ladder, or climb utility poles; work outdoors and inclement weather conditions; work in manholes.
- Must be able and willing to travel and work nights/weekends when the job requires.
- Maintain safe and secure work environment by following standards and procedures; complying with the legal regulations.

Physical requirements:

- Handling 50 pounds frequently and 100 pounds occasionally;
- Pushing, pulling, lifting and bending
- Manual dexterity in the performance of tasks
- Drive a company vehicle; must have a clean driver record
- All candidates subject to pre-employment physical and drug screening.
